

Triangle Recreation Camp

Development Committee Report

Jun 2016

Members:

I have attached two files that will be part of the VP of Developments report. One represents our communications concerning Water Rights.

Recently we received a letter challenging said rights under new rules. That attachment called "Water Rights" Is a response to our response to that demand letter. To be clear a none response to this letter could have jeopardizes our ability to take water from the ground. We are all good and are in the clear...

Mark our contractor also looked at getting our extension in order. This extension is to the existing plan for building or completing our water system and is the attachment called "Water System permit"

As always those changes touched on by the folks looking at our water rights also came into play when trying to get the permit extended for another year. The 1st attachment will be useful in our response to the 2nd attachment.

I will be requesting from the Board an amount not to exceed \$5000.00 to update our permit to remain in compliance with the new rules around water use.

These monies are intended to pay our Water Engineer to make updates to the plan and to Mark for his work at coordinating all of this. Rather than doing the work myself I will be asking Mark to work with the Engineer and State and County Agencies to get this plan updated.

He has experience with water issues and is a licensed Hydrologist.

Again I will be putting forward a motion to have funds set aside not to exceed 5k
